Avneesh Kasture

avneeshk.me | apkasture02@gmail.com

SUMMARY

Security engineer building **secure MCP servers** and hardening the **agentic layer** against prompt injection, tool misuse, and privilege abuse. Ships the deterministic controls — allowlists, identity verification, output scanning, audit provenance — plus the internal LLM-powered platforms teams use daily. Background in SOC operations and detection engineering.

EXPERIENCE

GRUVE | Associate Solutions Engineer, Professional Services

Apr 2026 – Present (assumed responsibilities Dec 2025) | Pune

- Built a **secure-MCP development framework** and hardened Python scaffold delivered to an enterprise client — threat modeling, runtime endpoint allowlisting, OAuth 2.1/PKCE with per-call JWT verification, DLP-scanned tool output, and a pre-delivery security-readiness gate.
- Built and deployed **Helix**, an internal AI sales-enablement platform — GPT-4o SOW generation (**15.7s** avg), automated pricing, and service navigation — adopted by **56 users**, and has saved an estimated **364 hours** so far.

GRUVE | Security Operations Center Analyst

Apr 2025 – Apr 2026 | Pune

- Performed advanced triage and investigation of security alerts across network, endpoint, and authentication telemetry using Splunk and CrowdStrike Falcon.
- Conducted threat hunting that identified a vulnerability and led to a customer-wide advisory report.

DELOITTE | Digital Forensics Intern

Jul 2024 – Feb 2025 | Mumbai

- Performed forensic acquisition and analysis of digital media using industry-standard forensic tools.
- Streamlined several business critical processes that cut down processing time by 80%.
- Automated virus scanning and documentation of images using Python (RPA).

SELECTED WORK

MCPLOITABLE | github.com/agileAlligator/mcploitable

June 2026

- Deliberately vulnerable MCP servers covering all ten OWASP Agentic Top 10 classes, with an L0→L3 control ladder scored by real effect.
- Hardened controls held across **105 attempts on three models with zero bypasses**; every model-dependent guardrail failed on at least one.

D2C-ANALYST | github.com/agileAlligator/d2c-analyst

May 2026

- AI analyst with server-side citation validation against a provenance model, a gpt-4o-mini→gpt-4o complexity router, and row-level-secure multi-tenant Postgres.
- Autonomous Margin Watch agent surfaced **~Rs. 4,642/month** in actionable savings on the seed dataset.

LIVE MCP SERVER | mcp.apkasture02.workers.dev

- Public MCP server (Cloudflare Workers) serving this résumé through real tools, with naive and hardened rungs demonstrating path-traversal confinement.

EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY

Bachelor of Technology in Computer Science and Engineering

2024 | Chennai

SKILLS

SECURE MCP & AGENTIC

MCP server design • OWASP Agentic Top 10 • Prompt-injection defense • Threat modeling • Tool scoping & sandboxing • OAuth 2.1/PKCE • JWT verification • DLP/PII scanning

BUILD & SHIP

Python • Docker • Express.js • PostgreSQL • Redis • Prisma • Azure • Cloudflare Workers • REST APIs

SECURITY OPERATIONS

Threat Hunting • Detection Engineering • Splunk (SPL) • CrowdStrike Falcon • Log Analysis

FORENSICS & SYSTEMS

Windows Forensics • Malware Analysis • Linux • Networking

CERTIFICATIONS

ISC2 | CERTIFIED IN CYBERSECURITY

AWARDS

2026 — Q1 Employee of the Quarter (global)
